

# How to save the Planet?

Simulations and their role in Science? - KS2  
Wednesday 14th March  
1.30pm – 4.30pm

Using a range of simulations to look at what they are, and how they can help learning about sustainability. Topics include building, transport, individual actions, planet survival, being a astronaut. It will look at using simulations and end with how to create simple simulations.

Teachers will take away a guide on how to run simulation sessions, and will have a set of recommended website simulations.

*Course leader:* Michael Newman

*Cost:* £55 for subscribers to Tower Hamlets Schools Library Service / £75

*Venue:* Professional Development Centre, English Street, London E3 4TA (nearest tube Mile End on Central, District and Hammersmith & City Lines)
